

# UltraTile helps bring much-loved community pub back to life

UltraTile are delighted to have played a part in the restoration of The White Swan – a pub based at the heart of Gressenhall Green, Norfolk.

**CONTRACTOR: DEREHAM TILES & CARPETS**

**MATERIALS USED: PROLEVEL ONE, PRORAPID RS, PROGROUT FLEXIBLE**

There has been a pub at the heart of Gressenhall Green for over 250 years but when the doors sadly had to close in 2018, and with the threat of the land being redeveloped for housing, the local community took it upon themselves to raise the necessary funds to transform their much-loved pub and reopen its doors once again.

The 'Save our Swan' community project has ambitious plans for the pub. Builders and volunteers have been hard at work stripping out the old fixtures, redesigning the interior space to provide more room and better facilities, and renovating the Cartshed to install a wood-fired pizza oven and dining area.

The Gressenhall Community Enterprise have done a tremendous job in raising the funds needed to restore and revitalise The White Swan. For the project to be a success, and to ensure funds and volunteers' time are used most effectively, it was crucial that the materials used throughout the restoration were reputable, trusted and guaranteed to perform.

Dereham Tiles & Carpets, flooring specialists with over 20 years of knowledge and expertise, recommended the use of UltraTile for all tiling installations.

UltraTile was delighted to be part of such an important community project and was more than happy to donate 50% of the adhesives and grouts needed, free of charge.

UltraTile ProLevel One was used to prepare the subfloor in the main pub and Cartshed, ready for installing the Jaipur Heritage antiquated limestone tiles with ProRapid RS tile adhesive and ProGrout Flexible grout.

Formulated for depths up to 60mm in one application, ProLevel One deep fill floor leveller incorporates a blend of specially graded fillers, cements and polymers to offer a rapid curing profile for early fixing of tiles, even at thicker depth applications.

ProRapid RS is a flexible rapid set tile adhesive specially formulated with enhanced adhesion and flexibility. These properties make ProRapid RS an ideal choice for use in wet areas, with underfloor heating systems and for installing porcelain, mosaic and natural stone tiles.

Available in 12 colours to complement popular tile choices, ProGrout Flexible has been formulated using ColourShield Technology for a vibrant and long-lasting finish with all tile types. Polymers have been added to the formulation of ProGrout Flexible to increase flexibility and to provide a virtually impermeable set.

“Brilliant, quality product that complements our limestone floor and adds to the character of our community pub”. Rosie Begg, Secretary at Gressenhall Community Enterprise.

There is still work to be done at The White Swan but with the hard work and dedication of the local community, the doors to this much-loved pub will reopen for business around Easter 2022.
