

UltraFloor makes country park renovation a walk in the park

Flooring specialists Lacey's Floors and Walls have used UltraFloor Level IT Hydra Bond to install 170sqm of flooring at Rushcliffe Country Park.

CONTRACTOR: LACEY'S FLOORS AND WALLS

MATERIALS USED: DPM IT, LEVEL IT HYDRA BOND

Green Flag award winners since 2007, Rushcliffe Country Park is a popular visitor attraction in Nottinghamshire. Work is currently underway to renovate the visitor centre including staff office and toilets.

Expert flooring specialists, Lacey's Floors and Walls were the contractors commissioned to install 170sqm of flooring throughout the visitor centre. To complete the installation, Lacey's Floors and Walls needed subfloor materials that would provide a super smooth finish to avoid any trip hazards and would withstand constant trafficking of visitors.

To begin, Lacey's Floors and Walls applied DPM IT damp proof membrane across the entire 170sqm area. DPM IT is a two component, solvent free epoxy resin system for use as a surface damp proof membrane. Designed to provide protection against subfloor moisture, DPM IT has a pot life of 45 – 75 minutes, a cure time of 5 hours and boasts a 98% RH floor moisture tolerance.

Once fully cured, the team applied UltraFloor's latest product innovation, Level IT Hydra Bond to a depth of 3-5mm.

Level IT Hydra Bond is a super polymer modified smoothing compound which utilises UltraFloor's unique technology – a process which enhances application and boasts unrivalled flow properties. What's more, each bag of Level IT Hydra Bond also contains 20% recycled material.

In addition, Level IT Hydra Bond can receive bonded floor

coverings after 4 hours, has an extended working time of 45 minutes for optimal usability, and is moisture tolerant and protein free.

To complete the project, Polysafe Wood FX and Verona flooring was installed throughout the visitor centre, office and toilets.

The flooring was installed with ease and Rushcliffe County Park's exciting new visitor centre is due to open later this year.

"Level IT Hydra Bond was a real pleasure to work with. It was easy to trowel and float on the floor and knitted together great between mixes. It even went nicely on the previous days screeding." Richard Lacey, Director at Lacey's Floors and Walls.
