

UltraFloor makes fast work of 44 Radisson Red Hotel bathrooms

14 Flooring have used Level IT Super Flex 30 to create 44 luxurious bathrooms at the Radisson Red Hotel in London Heathrow.

CONTRACTOR: 14 FLOORING

MATERIALS USED: LEVEL IT SUPER FLEX 30

Located at one of the world's busiest airports, Radisson Red Hotel provides the perfect location for holidaymakers to get a good night's sleep ahead of their flight or to chill out after a long day of travelling.

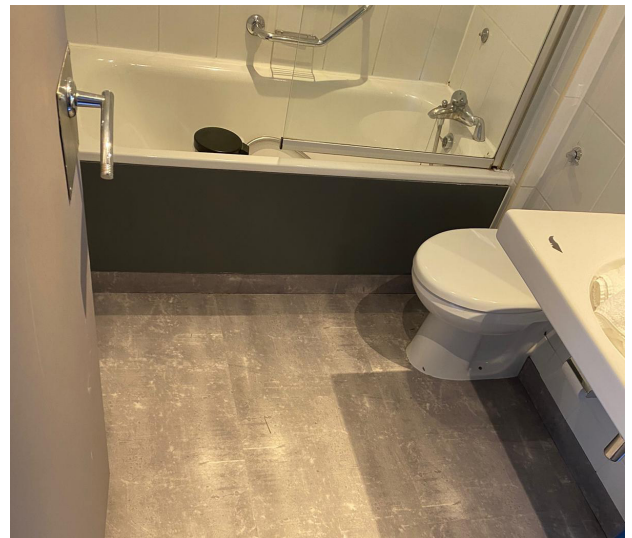

Forty-four bathrooms, across four floors, have undergone a makeover to provide guests with an even more magnificent stay.

Time was of the essence at this location. With guests already booked in, it was imperative that the flooring was completed on time to allow other trades to finish their works in readiness for the agreed handover date.

Commercial flooring specialists, 14 Flooring, partnered with subfloor preparation experts, UltraFloor, to install 3sqm of flooring, in 44 bathrooms, across 4 floors at the hotel.

In preparation of the Tarkett LVT large format tiles being installed, 14 Flooring primed the substrate using UltraFloor Prime IT Multi-surface Primer.

Formulated to promote the adhesion to all UltraFloor smoothing underlayments, Prime IT Multi-surface Primer reduces pinholing, minimising the risk of costly failures. With a coverage rate of 200sqm at 3:1 dilution, Prime IT Multi-surface Primer is a must-have product for all flooring installation projects.

Once cured, Level IT Super Flex 30 was applied across the entire area, resulting in the smoothest of subfloors.

Specifically designed for use over a wide variety of subfloors including steel mezzanine decks and flooring grade plywood, Level IT Super Flex 30 is a rapid setting and drying, fibre reinforced flexible smoothing finishing compound.

Developed with a high polymer content, Level IT Super Flex 30 boasts superior flexible properties, making it the perfect smoothing underlayment for floors where movement is likely.

What's more, subfloors prepared using Level IT Super Flex 30 are available to receive foot traffic in as little as 30 minutes, bonded floor coverings after 1 hour and resin finishes and forklift traffic after just 24 hours, allowing you to move on to another project quickly.

The expertise and skills of 14 Flooring teamed with the fantastic performance of UltraFloor, meant that it took the team just six days to prime, latex and install flooring across the hotel bathrooms.

On selecting UltraFloor for the project, Daniel Lunan, Director of 14 Flooring, commented: **"I chose Level IT Super Flex 30 for its rapid setting and rapid drying properties. With many bathrooms to complete in a short time frame, the smoothing compound drying quickly, without airflow, enabled us to work and install flooring the same day, which was essential. Having used Level IT Super Flex 30 many times in the past, I knew I could rely on it to perform exactly how I needed it too."**
